JointBackend

abstract: configure/enable/read/write/step

KinematicBackend
ideal 2nd-order joints
no physics, runs in CI

MujocoBackend
contact, armature,
1 ms command delay

CameraBackend

abstract: configure/capture/intrinsics

SimCameraBackend
MuJoCo render + z^2
range noise

RobStride06Backend

2 x CAN @ 1 Mbit/s
python-can, 400 Hz

RS06 frame codec
model-specific scaling

NuwaHP60CBackend

UVC / vendor SDK
USB 3.0

Per-joint mapping
direction, offset_rad
ratio, efficiency
bus, motor_id, calibrated

Maps motor output
to canonical joints.
Knee reduction 2:1.

Verify with
calibrate_joint
